Overview

MAGEWELL®

Ultra Encode AIO is a standalone and compact H.264/H.265/NDI|HX encoder for streaming and recording simultaneously. It fits the standard 1RU form factor, allowing two encoders be rack mounted together with supplied mounting hardware for 1RU use. Ultra Encode AIO offers both SDI and HDMI I/O with the capability to stream up to 4K30 to 6 streaming destinations. Recording can be made to external SD card, USB storage and NFS/CIFS/SMB network storage. Ultra Encode AIO also provides Picture-In-Picture, Side-By-Side and graphics functionality in hardware for compelling presentations. It is designed for high quality streaming and IP workflows, including sports, education, live event and much more.

PART

PART TWO
Functional Characteristics

Content Production

Customers can create Picture-in-Picture or Side-by-Side streaming and recording output from multiple input sources. Graphics functionality is also provided to make presentation compelling.

Picture-in-Picture

Side-by-Side

Graphics Functionality
(text, picture, clock)

Streaming

Ultra Encode AIO supports streaming up to 6 separate destinations simultaneously at 32Mbps for each streaming session.

Protocols and sessions

There are differences in the amount of sessions customers can create when applying different streaming protocols in their workflow.

Due to the limitation of account authorization, only 1 session can be streamed to Facebook or Twitch. For example:

Facebookx1+Twitchx1+RTMP/RTMPSx4 (**Ture**)

Facebook**x2**+Twitchx1+RTMP/RTMPSx3 (**False**)

Facebookx1+Twitch**x2**+RTMP/RTMPSx3 (**False**)

Protocols and sessions

There are differences in the amount of sessions customers can create when applying different streaming protocols in their workflow.

Allow use one protocol to
create 1 streaming session

How to apply all the above protocols in one streaming task? For example:

Protocol combination: True

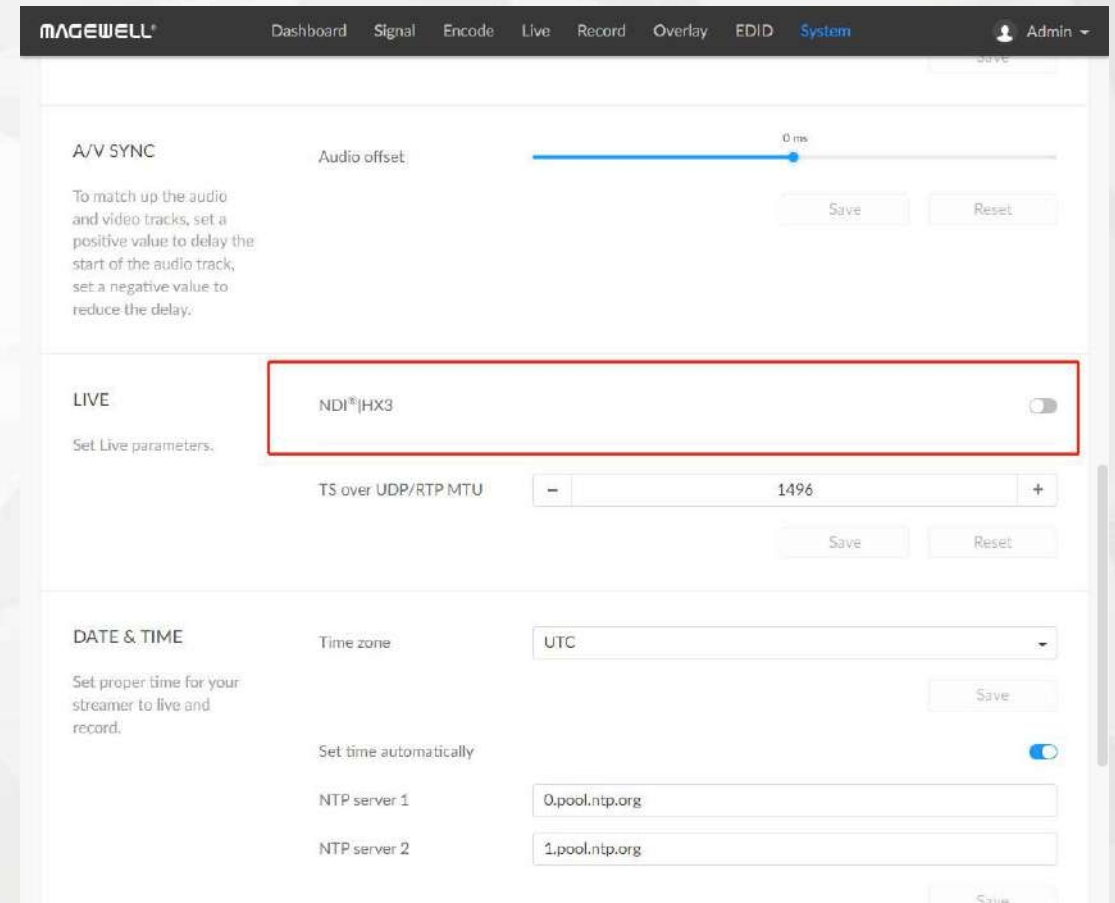

- HLS x1
- SRT Listener x1
- RTSP x1
- NDI HX2 x1
- TVU ISSP x1

Protocol combination: **False**

- HLS **x 2**
- SRT Listener x1
- RTSP x1
- NDI HX2 x1
- TVU ISSP x1

NDI®|HX 3 Compatibility

Ultra Encode AIO supports high-efficiency, low-bandwidth NDI®|HX 3 standard. Customers can manually enable NDI®|HX 3 through Web GUI and send streams at up to 80Mbps. When NDI®|HX 3 is enabled in the device, all other streaming and recording tasks maintain disabled.

A screenshot of the MAGEWELL web interface. The top navigation bar includes links for Dashboard, Signal, Encode, Live, Record, Overlay, EDID, and System (which is highlighted). A user profile icon labeled "Admin" is on the right. The main content area is divided into three sections: "A/V SYNC" with an "Audio offset" slider set to 0 ms and "Save" and "Reset" buttons; "LIVE" with a red-bordered box around the "NDI®|HX3" toggle switch (which is currently turned off), and a "TS over UDP/RTP MTU" field set to 1496; and "DATE & TIME" with a "Time zone" dropdown set to "UTC", a "Set time automatically" toggle (which is turned on), and two "NTP server" fields set to "0.pool.ntp.org" and "1.pool.ntp.org". Each section has a "Save" button at the bottom right.

Recording

Ultra Encode AIO supports streaming and recording simultaneously. The recording can be made in 3 ways.

USB storage
(MP4/ MOV)

SD card
(MP4/ MOV)

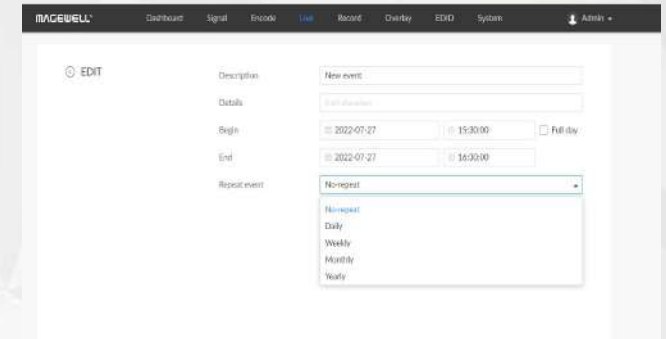

Network storage
(NFS/CIFS/SMB)

Scheduler

Ultra Encode AIO provides presetting for streaming and recording through scheduler available in Web GUI.

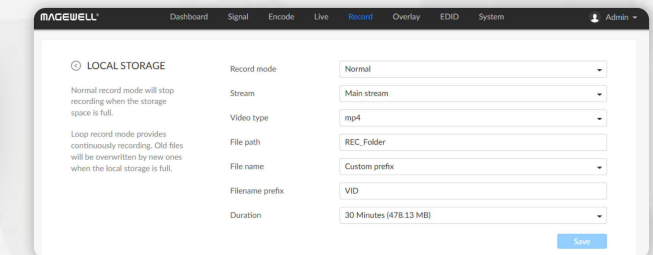

Streaming

Screenshot of the MACEWELL Web GUI "EDIT" page for scheduling a live event. The page includes fields for Description, Details, Start/End times, and a Repeat event dropdown menu.

EDIT	
Description	New event
Details	Event description
Begin	2022-07-27 15:30:00 <input type="checkbox"/> Full day
End	2022-07-27 16:30:00
Repeat event	No-repeat
	No-repeat Daily Weekly Monthly Yearly

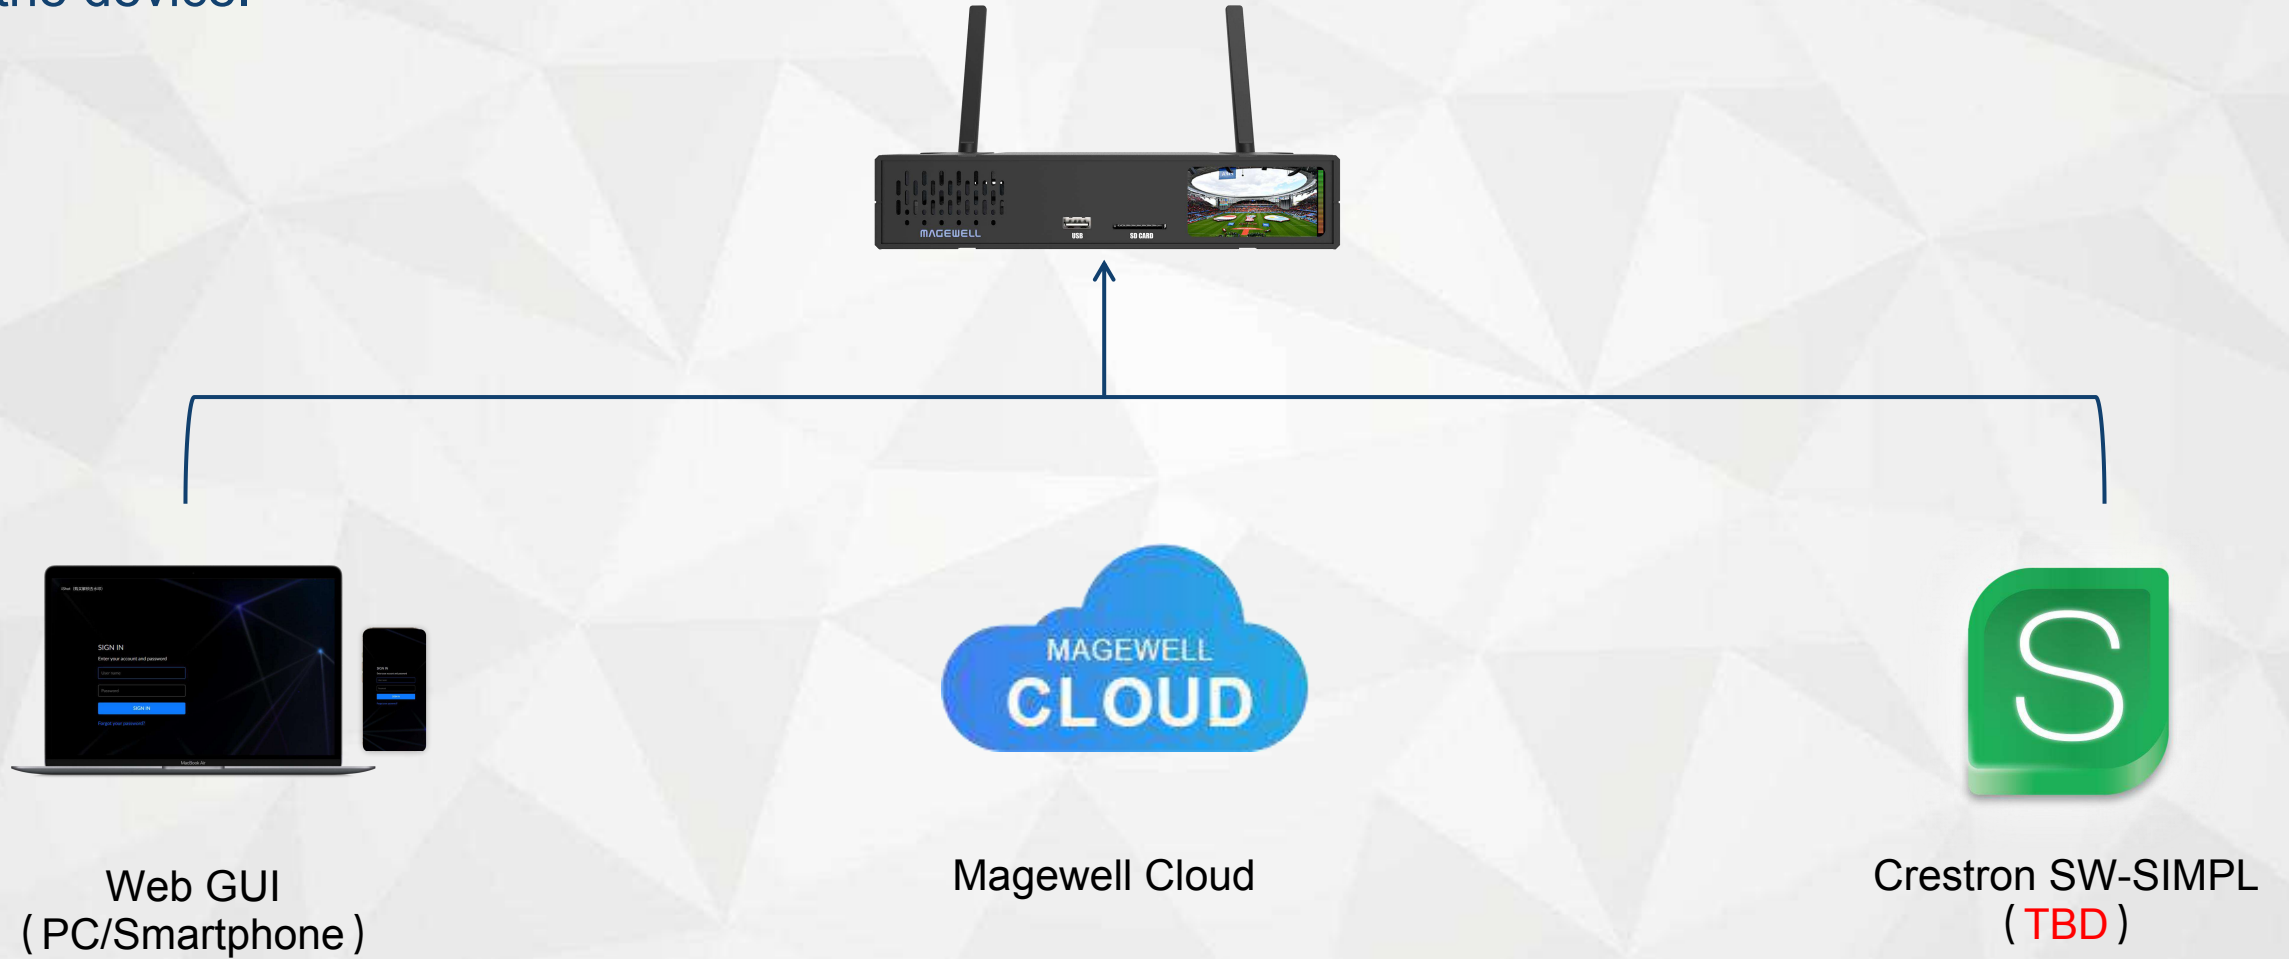

Recording

Screenshot of the MACEWELL Web GUI "LOCAL STORAGE" page for configuring recording settings. The page includes dropdown menus for Record mode, Stream, Video type, File path, File name, and File name prefix, along with a Duration field.

LOCAL STORAGE	
Record mode	Normal
Stream	Main stream
Video type	mp4
File path	REC_Folder
File name	Custom prefix
File name prefix	VID
Duration	30 Minutes (478.13 MB)

Device Control

Ultra Encode AIO provides great flexibility for customers to configure, monitor and control the device.

Product Comparison

Connections

Ultra Encode HDMI/SDI

- Input: HDMI or SDI
- USB-B config
- Antenna x1
- Switch x0
- 12V

Features

- **Streaming:** up to 6 sessions with limitation on streaming protocol combination
- **Encoding:** with resolution up to 2K60, with bitrates up to 16Mbps
- **Audio:** 8-channel input and 2-channel encoding
- **Web GUI style:** Black

Ultra Encode AIO

- Input: HDMI和SDI
- USB-C config
- Antenna x2
- Switch x1
- DC 9 ~ 18 V (screw locking power+PoE)
- LCD touchscreen

- **Encoding:** with resolution up to 4K30, with bitrates up to 32Mbps for each session
- **Streaming:** up to 6 sessions with greater flexibility on streaming protocol combination
- **Recording:** SD card, USB storage, network storage
- **Audio:** 8-channel input and encoding
- **Web GUI style:** White
- **Supports** content production (PinP, side-by-side, graphics overlays)
- **Supports** scheduler for streaming and recording
- **Supports** TVU ISSP protocol
- **Supports** NDI|HX3 standard

AJA HELO Plus vs Ultra Encode AIO

MAGEWELL®

Connections

AJA HELO Plus (\$1699)

- 1×HDMI & 1×SDI In
- 1×HDMI & 1×SDI Loopthru
- 1×3.5mm TRS in/out
- 1×SD Card Slot
- 1×USB A & 1×Mini USB
- 1×RJ45

Features

- LED Stereo VU meters
- USB A port for media recording and playback. It also supplies 1A of current to the storage device.

Ultra Encode AIO (TBD)

- 1×HDMI & 1×SDI In
- 1×HDMI & 1×SDI Loopthru
- 1×3.5mm Line in/out
- 2×USB A & 1×USB C
- 1×SD Card Slot
- 1×RJ45
- 2×WIFI

- LCD touchscreen (audio volume column)
- 1RU rackmounting
- NDI | HX3 compatibility
- Stream to up to 6 destinations simultaneously
